# How to use Hope Beacon

### An illustrated walk through the app, for the people using it

Every picture here is the real app, photographed on a phone-sized screen. Nothing is drawn or mocked up. The sample names you will see (John, Maria, Pastor Ramos) are the demo's own people, not anybody in your church.

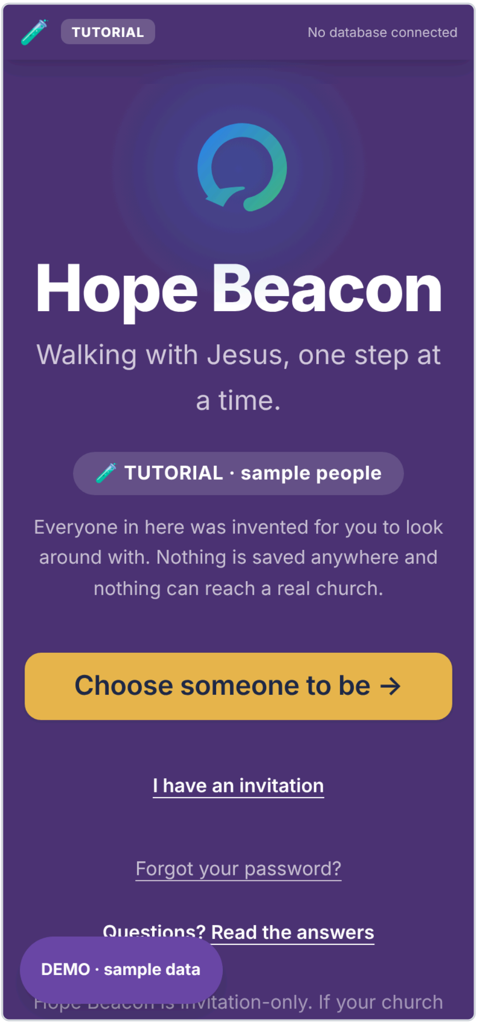
If you only read one page, read **Part 2**. That is the whole app for most people.

---

## Part 1 — Getting it on your phone

Hope Beacon is a website that behaves like an app. There is nothing to find in the App Store or Play Store, and nothing to pay for. You open a link once and then keep it on your home screen.

### The link, and what you see first



TUTORIAL
No database connected
Hope Beacon
Walking with Jesus, one step at a time.
TUTORIAL · sample people

Everyone in here was invented for you to look around with. Nothing is saved anywhere and nothing can reach a real church.

DEMO · sample data

Hope Beacon is invitation-only. If your church

*The front door. Anybody can open this; it is the only page that does not need an account. I have an invitation is the way in.*

## Install it, so it opens like an app

Installing means the app gets its own icon, opens without the browser's address bar, and remembers you. It is the same app either way, only tidier.

### On an iPhone or iPad (Safari)

1. Open the link in **Safari**. It has to be Safari; Chrome on an iPhone cannot install a web app.
2. Tap the **Share** button at the bottom of the screen (the square with an arrow coming out of the top).
3. Scroll down the list and tap **Add to Home Screen**.
4. Tap **Add**. The icon appears with your other apps.

### On an Android phone (Chrome)

1. Open the link in **Chrome**.
2. Tap the **three dots** at the top right.
3. Tap **Add to Home screen**, then **Install**.

### On a computer

Chrome and Edge show a small install icon at the right-hand end of the address bar. Safari on a Mac has **File → Add to Dock**.

> **If you are asked to sign in again after installing**, that is normal once. The installed copy starts its own session. It will remember you afterwards.

Everything to do with installing also lives inside the app, under Settings, so nobody has to keep this page to hand:

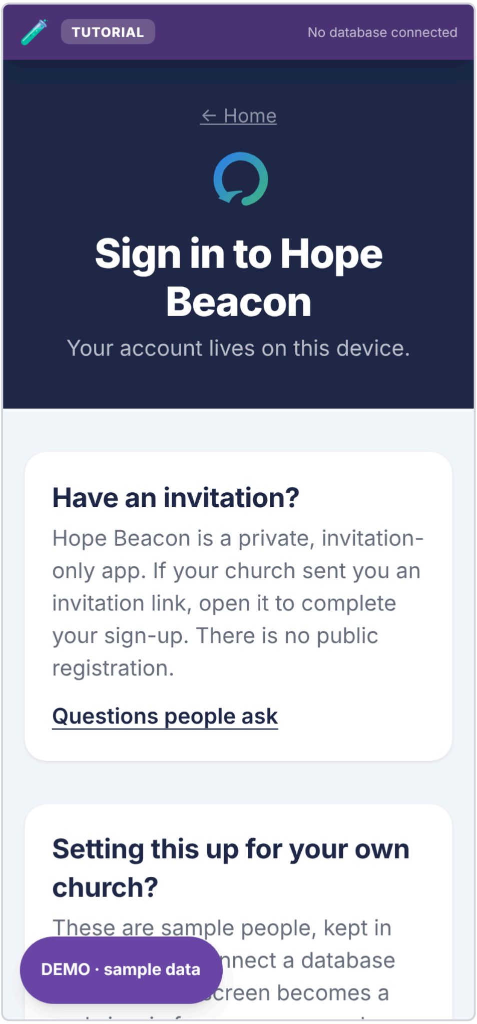
Write a message

*A conversation with Text size at its largest. The words grow and still fit the screen.*

## Signing in

You need an invitation from your church. When you have one, you pick who you are and the app takes you to your own part of it.



Sign in to Hope Beacon

Your account lives on this device.

Have an invitation?

Hope Beacon is a private, invitation-only app. If your church sent you an invitation link, open it to complete your sign-up. There is no public registration.

Questions people ask

Setting this up for your own church?

These are sample people, kept in … nnect a database … creen becomes a

*Signing in. There is no public sign-up: if you have no invitation yet, ask your church for one.*

**Forgot your password?** Tap **Forgot your password?** under the sign-in button. It opens a page of its own (`/forgot-password`): type your e-mail address and press **E-mail me a link**. The link in that e-mail opens another page, **Choose a new password** (`/new-password`), where you type the new one twice. If your account uses an authenticator app, it asks for the code too. Each link works once, for one hour, and only the newest one works. Once you are signed in, you can change your password at any time in **Settings, Password**.

## Finding your way

Along the bottom of every screen are three words. **Menu** lists every place you can go, written out. **People** opens the people you walk with. **My Files** opens the church's resources and your own files. On a phone or a pad, tap a chip under the search box (Bible study, Devotion and the rest) to narrow the list, and choose **On this device** for your own files: **Upload files** or **Add a link** at the top, and Delete asks a second time before anything goes.

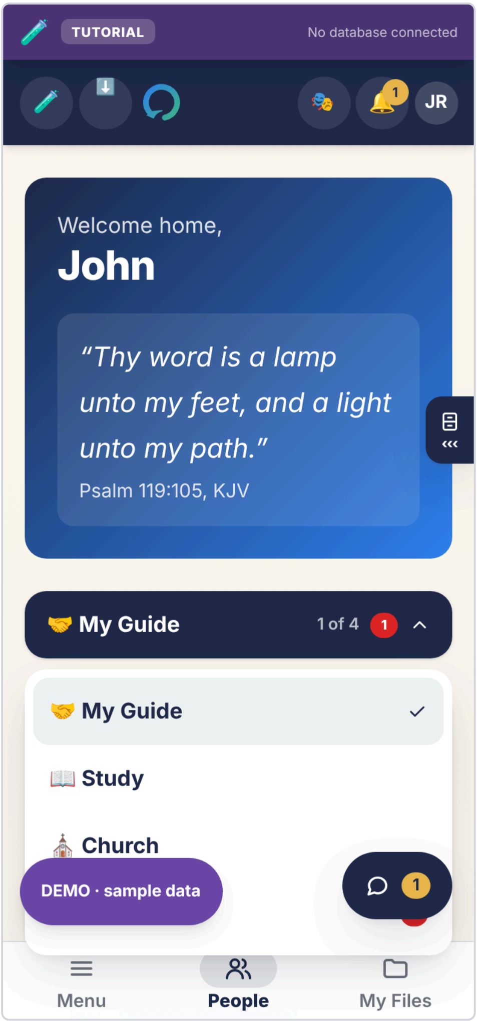
*The Menu. Every room is written out, with your own profile at the top.*

Some screens hold several **folders**. The button at the top names the one you are in and how many there are; tap it to see them all, then tap one to go there.



Welcome home,
**John**

*“Thy word is a lamp unto my feet, and a light unto my path.”*
Psalm 119:105, KJV

*A folder list, open. It says you are in My Guide, 1 of 4, and lists the rest.*

## Music

**Music**, in the Menu, is for everybody: the choir, and anybody who loves music. Everything in it happens on your phone, and nothing is sent anywhere. It has five folders. Each opens simple; tick **Advanced settings** at the end of a folder for more, and untick it to put the folder back as it was.

- **Listen** plays your own music and videos, in playlists if you like, and has calming sounds for the background. Your music is still in My Files as well, and each file there has its own Play button for a quick listen.
- **Tuner** is a dial with the note in the middle. Tap the round **microphone** button and sing or play: the marker leans left when you are flat (♭), right when you are sharp (♯), and the dial says ✓ **In tune** inside the green band. Your phone asks once whether the app may use the microphone; it records nothing. Tap the button again to stop. **Starting note** plays a note for the choir, like a pitch pipe. **Concert pitch** (tap it to open) is where the choir's A sits: 440 is the standard; tap 442 or 432 and you hear the new A, and to match an organ or a piano, ask for its A and tap **Listen for the A**. In **Advanced**: **Sing the note**, a keyboard: tap a key, sing it and hold it, and it says **Perfect**, **Close** or **Try again** (and what you sang), with a burst of notes for Perfect. On a computer, type the note (**A S D F G H J K** are C to C, **Z** and **X** the octave); on a tablet or a computer the dial and the keyboard sit side

by side, and on a computer the Music room keeps the whole width (your desk waits in the tab on the right edge), so the dial, both octaves and your grade fit one laptop screen. **More tools** holds a line drawing your voice over the last ten seconds, a **drone** to sing against, and the notes as a clarinet, trumpet, saxophone or horn reads them.

- **Pieces** keeps your choir's music. **Scan a page**: take a photo of a printed page, drag the four dots onto its corners, and tap **Make a clean page**. **Open a score or PDF**: a MusicXML file from MuseScore, Sibelius, Finale or Dorico, or a PDF that MuseScore or Dorico made, read note by note on the phone (check it against the page; a scanned PDF stays a picture). Choose **Your part** to hear it louder, slow it down, and tap the notes to start from anywhere. In **Advanced**: move it up or down to suit your voices, loop a hard passage, silence your own part to sing it, and choose the sound.
- **Play** is a piano keyboard: press and hold a key to hear it. In **Advanced**: the chords of any key a tap each, and a beat maker with a bass drum, snare and hi-hat, with your own beats saved by name.

## Part 2 — If you are an Explorer

An Explorer is somebody the church is walking with. You have one Guide, and the app is built around that one relationship.

Your screen has four folders: **My Guide**, **Study**, **Church** and **Prayer**. Tap the button at the top to go straight to one. You never have to scroll a long page looking for something.

### My Guide

Your Guide, and anything waiting from them. Your conversation with them is the round **Talk** button in the corner of every screen, with a number on it when they have written. It is private between the two of you. Church leaders cannot read it.

*The Sabbath program. Each line says what happens, which hymn or passage, and who leads it.*

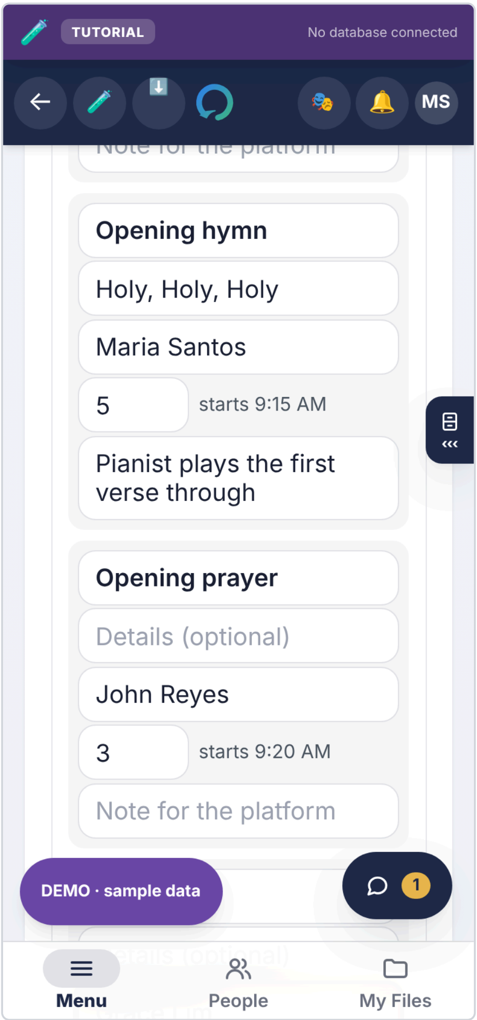
- **Download Word file** gives you a file that opens in Word, in Pages, and in Google Docs (upload it to Google Drive, or open it in the Google Docs app).
- **Download picture** gives you a picture of the program for a group chat. On a phone, **Share the picture** sends it straight to Messenger, Viber or email.
- **Copy as text** is for pasting into a group chat.
- **Post it**, under **Share in the app**, puts it in the app for the people you walk with, or for everyone in the church. They find it on **This Sabbath**, in the Menu.
- **Reuse next week** starts next week's program from this one, names and all.
- **Arrange lines**, under a part, is for moving a line or taking it out.
- **Folder** keeps programs in order: type a name such as "Quarter 4", and the list groups them.
- **Add to calendar** puts each part of the day that has a time on your phone's calendar.

**To design it in Canva**, a free account is enough. In Canva, choose **Upload** and add the picture or the Word file. The app does not connect to Canva.

**Advanced settings**, a tick box above your programs, adds more:

- **Minutes** for each line, so each line shows when it starts. If one part runs into the next, the program tells you.

- **A note** on any line, for the people on the platform. Choose **For the platform, with times and notes** before you download to get a copy with them. The copy for the congregation, the picture and the post never have the notes.
- **Your own details**, for anything the boxes do not cover, such as "Deacons on duty". Press **Add a detail**, give it a name, and write what it says. It prints under the theme.
- **Save as a template**, to start next time from your own layout.
- **Reminders**: everyone named, each with a message ready to copy and send.



Opening hymn
Holy, Holy, Holy
Maria Santos
5 starts 9:15 AM
Pianist plays the first verse through

Opening prayer
Details (optional)
John Reyes
3 starts 9:20 AM
Note for the platform

*Advanced settings. Each line has its minutes, when it starts, and a note for the platform.*

Your programs are saved on your phone or computer as you type, and work with no signal. In your church's app they also follow you to any phone or computer where you sign in. Nobody else sees them until you post them or download them. Directors have the same folder.

## Evangelistic meetings

The **Evangelistic meetings** folder in the Office plans a series of meetings your own way. Press **New meetings**, choose the first night and how many nights, then **Start with a plan** or **Start blank**. The plan gives each night from 5:30 to 9:00 PM: children's time (songs, a Bible story, craft making), health time, Bible study, and snacks, plus a team and a to-do list. Change any of it.

- Tap a night to open it. Give it a date, when it starts and ends, and a topic.
- **Add a block** puts a program, a team, a schedule, a list, a paragraph or a checklist on a night or on the whole series. **Arrange blocks** moves them.
- A list's **Columns** lets you name its columns yourself, up to six.
- **Copy to a new night** makes the next night from this one.
- **Its look** chooses a colour, a heading style, and where the name sits, for the Word file and the picture.
- Tick **Team only** on anything that is not for the public. It stays out of the picture and anything you post.
- **Folder** keeps many series in order, such as "Youth Week".

Song sheets

Bible story

Grace Lim

*Evangelistic meetings. A night's children's time, with a column you added yourself.*

Under **Take it away**, choose the whole series or one night, then download a Word file or a picture, or **Post it** for the people you walk with or the whole church.

## On your calendar, and on your other devices

**Add to calendar** downloads a calendar file. Open it and your phone or computer adds every night (or each part of a Sabbath program that has a time). On an iPhone it is one tap. On a computer, Google Calendar takes it under **Settings**, **Import**. If you change a night, download it again.

**Google Calendar** appears when you choose one night: it opens Google Calendar with that night filled in, ready to save.

Add to calendar downloads a calendar file: open it and your phone or computer adds every night. To change a night later, download it again. Google Calendar opens one night in Google Calendar, ready to save.

The Word file opens in Word, Google … To design it in C… …ugh: in Canva… …the Word file or the…

*Add to calendar and Google Calendar, under Take it away.*

**On another phone or computer**, sign in with the same account and open the Office: in your church's app, your programs and meetings are there. Under **Saved** it says whether they have reached your account yet. With no signal, they wait on the phone and go up by themselves when the signal comes back.

## This Sabbath

**This Sabbath**, in the Menu, shows the Sabbath program your Guide or your church has posted, with who shared it, and any evangelistic meetings they have posted. Once you have opened it with a signal, it opens again with none, so you can read it in a church hall without signal.

This Sabbath

The order of service your church has shared, kept on this phone.

**Grace SDA Church**

Sabbath, November 14, 2026
Theme: Rest for the weary
Deacons on duty: Anna Yu and Peter Tan

**SABBATH SCHOOL · 9:00 AM**

Song service (David Cruz)

Opening hymn: Holy, Holy, Holy (Maria Santos)

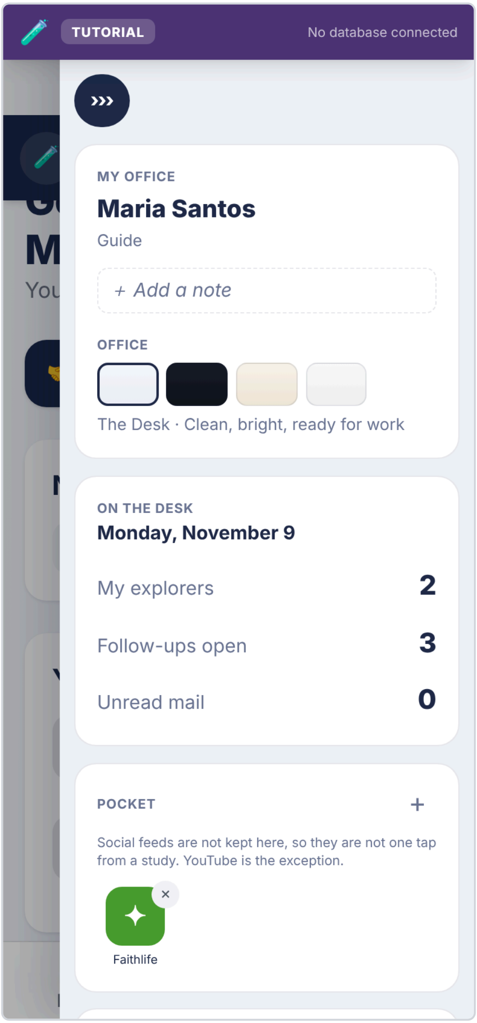
Opening prayer (John Reyes)

Welcome (Grace Lim)

*This Sabbath on a phone. The church, the date, the theme, then each part of the day and who leads it.*

## Your desk drawer

On a phone, your desk is a drawer. Tap the small cabinet on the right edge, or swipe in from that edge: the date, what is waiting, a note to yourself, and a pocket of links. Tap ››› to put it away.



MY OFFICE

Social feeds are not kept here, so they are not one tap from a study. YouTube is the exception.

*The desk drawer, open: today's date, what is waiting, a note, and the pocket.*

The colour squares at the top of your desk change the colours of the whole app. They work in every look. The first square is the look's own colours, so you can always go back. In Focus, which is dark, a colour stays dark: Warm Office becomes a warm evening brown. Each look remembers its own choice.

## Writing for the church

On **Home**, press **Write a post**, near the top. The writing box opens with the cursor already in **Title**: give it a title, write, and press **Publish**. Everybody in the church reads it, with your name on it, and the box says so once it has gone.

Write a post

Something to share with your church?

Grace SDA Church

1 conversation this week

3 Explorers walking 2 Guides

Sabbath worship

This Sabbath, 9:00 AM

Gather with the church family this

and study.

*Home opens with Write a post near the top.*

That is all most posts need. Under **Publish**, **Advanced settings** is there if you want it: send the post only to the people you walk with, or to people you choose, or **Save as draft** to finish it later. You never have to open it.

The same box is in Home's **Blog** folder, with what the church wrote below it.

paragraphs. A YouTube or Facebook link plays in the post.

Up to 10 photos and one short video of about a minute. Photos are made smaller and lose where they were taken before they are kept.

Everyone in the church sees it, with your name on it.

☐ Advanced settings (choose who sees it, or save as a draft)

*Write a post: a title, the post, Publish, and Advanced settings under it if you want it.*

To pin a notice at the top of everybody's Home, open Home's folder button and choose **Announcements**: a title, the words, **Pin it**. **Advanced settings** adds when it happens, such as "This Sabbath, 9:00 AM". Take a notice down from **Notices**, beside the notice itself.

## Part 4 — If you are a Director

Directors run the church's account: who gets in, and who walks with whom.

### Who is waiting

The single most important screen in the app. **An Explorer with no Guide has no app**, so anything above zero here is somebody being ignored.

Sample people, invented in this browser. Nothing here is real.

Everything happening across the church, in one place. Everyone sees this board. No one's private journey is ever shown here.

Gather with the church family this Sabbath for worship and study.

Every evening this week, c
All are welcome.

Social feeds are not kept here, so they are not one tap from a study. YouTube is the exception.

*The church home.*

**Four questions, once a week, five minutes:**

1. Is anybody unpaired?
2. Is any Guide at their limit of five while Explorers wait?
3. Is any guild flagged "Needs a look"?
4. Is anything waiting in **Admin Reports**?

Without that rhythm the numbers are decoration.

## Giving toward the app

Members can help pay for the app the way they give toward anything else in the church. It is optional: it appears only once whoever looks after your church's database switches it on (the Handbook, "Keep our Hope Hub running", says how). Then, in **Settings, 💛 Giving**, set the monthly goal (about ₱1,710 on the standard plan) and the church's own GCash and bank details, then name the treasurer. Members then see the month's goal and total on Home, with how to give. Only the treasurer records each gift and sees it; nobody sees who gave.

### Admin Reports

Reports are in **Admin Reports**, in your Menu. Press **Pick this up** on one that is waiting: the person who raised it is told, and you can talk to them in its conversation, which every leader who may handle the report can read. Once you have read it, **Bring them into the conversation** lets the person it is about read it and answer; the app says what that does first, and it cannot be undone. Close a report with its outcome when it is decided. If something has to stop, **Suspend or remove** is under Safeguarding. *Reports and the record* says the rest.

### The progress report

**Reports**, in the Office, shows every Explorer in the church by stage and by Guide, for a month or a quarter, with who needs somebody to look. Bible studies, lessons and follow-ups stay between each Guide and Explorer, so they are in each Guide's own report, not yours. Ask a Guide for theirs.

### Feedback

Everything members send with **Send feedback** arrives in **Admin, Feedback**, with what is waiting on you at the top.

1. Press **Review and hand on**. The write-up starts as their own words: take out names, phone numbers and anything private, and say what "done" looks like if you can.
2. Choose who takes it: **I'll fix it**, **A developer**, or **An AI tool**, and press **Save**.
3. Hand it on: **Copy the brief** to paste into an AI tool or a message, **Open as a GitHub issue**, or **Download for AI tools** for everything still open. Only your write-up leaves the church, never what they wrote, their name or how to reach them.
4. When it is fixed, **Mark done** with the version, or **Won't do** with a word saying why.

The person who sent it sees **Received**, **Being looked at**, **Done** or **Not this time** under their own feedback button, never your write-up. The whole journey is in `docs/FEEDBACK.md`.

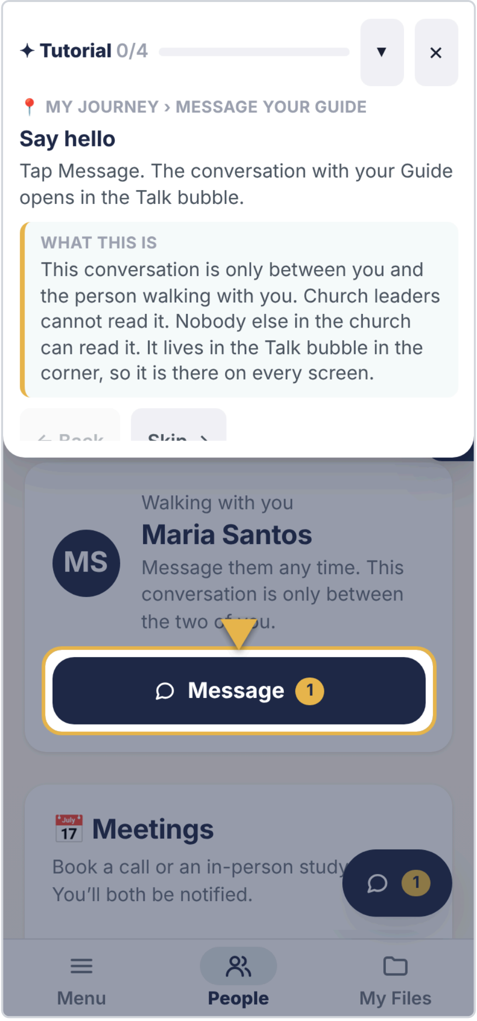
### Your church's legal details

The Terms of Use and the Privacy Notice name your church and the person who answers privacy questions. Fill them in once, in **Settings, Church, Legal details**: the church's legal name, its registered address, and its Data Protection Officer's name and email. Until all four are there, both documents say plainly that the church has not filled them in yet.

---

## Part 5 — The guided walk

If you would rather be shown than told, the app will walk you through your own part of it. Pick who you are on the front door and follow the highlight. It points at the next thing to tap, and explains what it is before you tap it.



**Say hello**

Tap Message. The conversation with your Guide opens in the Talk bubble.

WHAT THIS IS

This conversation is only between you and the person walking with you. Church leaders cannot read it. Nobody else in the church can read it. It lives in the Talk bubble in the corner, so it is there on every screen.

Walking with you

**Maria Santos**

Message them any time. This conversation is only between the two of you.

Book a call or an in-person study

You'll both be notified.

*The guided walk. It highlights the next thing, and says what it is for.*

It takes two or three minutes, uses safe sample data, and nothing you press reaches a real person.

---

## If something looks wrong

- **A blank screen, or something out of place after an update.** Close the app fully and open it again. It checks for a new version each time it starts.
- **You cannot find a button somebody told you about.** Check which folder you are in. Tap the button at the top of the screen; what you want may be in another folder.
- **The app says your invitation is not valid.** Invitations expire. Ask your church for a new one.
- **You changed your profile picture and the old one is still showing.** Close and reopen the app once.

Anything else, use **Send feedback** at the bottom of the front door. It takes a sentence.
